Winter cereal aphids (oat, corn) Northern region

Autumn outbreaks occur in warm conditions

JAN | FEB | MAR | APR | MAY | JUN | JUL | AUG | SEP | OCT | NOV | DEC

**ADULTS**

Critical monitoring period - Monitor aphid and beneficial numbers

Optimal spray timing

**NYMPHS**

Risk of crop loss is higher where aphid infestations are heavy and prolonged, and crop compensation compromised by dry conditions

Optimal spray timing

Critical monitoring period - Monitor aphid and beneficial numbers
